[Legend] ○ : To specify the health insurance (required items) ☆ : Optional tests specified by the Insurance Society

◎ : Additional items from the fiscal year 2019 △ : Price difference by switching from Barium to nasal or oral Gastroscope must be borne by patient.

[Notes] - Test items of a complete physical examination will be based on the standard

test items conducted at individual medical institutions.

- Palpation for a breast cancer test is offered by some medical institutions.

- The Insurance Society will cover all costs even if you request both mammography and sonogram for your breast cancer test.

- Secondary tests and thereafter (re-examination and more thorough tests) will be considered as health insurance treatment.
